Lucas Ariel Fanelli Sánchez

Software Developer · Trainee / Working Student

Vélez-Málaga, Spain · lucasarielfanelli@hotmail.com · linkedin.com/in/lucasarielfanelli · github.com/lucas-fanelli · portfolio-lucasfanelli.com

Third-year student of the Double Degree in Computer Engineering + Mathematics (University of Málaga, 8.7/10 GPA). **AI-assisted developer**: I design and lead web, mobile and game projects through to production, using AI as a support tool, not as a substitute for engineering judgement. Focus on Clean Architecture, SOLID and testing (TDD/E2E). Seeking a *working-student / junior* role to grow within a team.

PROJECTS

Remy — Recipe Platform (full-stack, in production) · remy-recipes.com

Next.js 16 · TypeScript · Prisma · PostgreSQL · Vercel

Social recipe platform: JWT/bcrypt authentication, profiles with follows, likes and comments, pantry management with recipe *matching*, and an installable PWA. Clean Architecture + Repository pattern. CI/CD with GitHub Actions and Sentry; **1,161 tests with 98% coverage** (Jest + Playwright E2E).

Heladera — Shared Grocery List (PWA, in production) · heladera-ec2b4.web.app

TypeScript · React 19 · Vite · Firebase

A list a family uses every day, **offline-first and real-time**. Private lists with expiring invites and no backend of its own: Firestore security rules decide who gets in, tested case by case on the emulator. One contract suite runs against both the fake Db and Firestore; 28 architecture decisions on record.

SleepSync — Android App *(Google Play · internal beta)*

Kotlin · Jetpack Compose · Hilt · Room · Health Connect

Detects when the user falls asleep through a **two-layer system** (popup confirmation + accelerometer/activity) and sets the alarm automatically. Adaptive calibration, 100% offline and bilingual. Clean modular architecture + MVVM; tests with JUnit 5, MockK and Turbine.

Withdrawal — Game *(Unity · target: Steam)*

C# · Unity 6 (URP) · ElevenLabs

First-person psychological horror. A data-driven horror-event engine (ScriptableObjects), a fear model that modulates lighting, audio and visuals in real time, and systems decoupled through an Event Bus. AI-generated voices (ElevenLabs).

JARVIS — Local Voice Assistant *(in development)*

Python 3.12 · asyncio · Ollama · Parakeet STT · ONNX Runtime

A voice assistant that runs entirely on the PC, no cloud. A hand-built streaming pipeline (turn detection, STT, router, local LLM and TTS) with every stage's latency measured and logged; the LLM was picked with a benchmark of 7 models measured on the GPU.

EDUCATION

Double Degree in Computer Engineering and Mathematics

University of Málaga (UMA) · 2024 – present (3rd year)

GPA 8.7/10 · university entry score (PEvAU) 13.400/14. Honors (Matrícula de Honor) in Programming, Topology and Geometry.

Relevant courses: Programming, Data Structures, Software Engineering, Foundations of AI, Algebra, Mathematical Analysis, Probability & Statistics.

Technological Baccalaureate

IES María Zambrano, Torre del Mar · 2024

EXPERIENCE

Crew Member — McDonald's

Vélez-Málaga · Jul–Sep 2024 · Dec 2024 · Jul–Sep 2025 · Dec 2025

- Teamwork under high pressure and fast pace during high-volume shifts.
- Took on additional responsibilities and operated autonomously (single-handedly running the fryer station, normally staffed by two).
- Recognized as the best at the station; positive feedback from management.

TECHNICAL SKILLS

AI: AI-assisted development (Claude Code); API integration (Claude SDK/CLI, ElevenLabs); local LLMs (Ollama)

Project stack: TypeScript · React · Next.js · Kotlin · Jetpack Compose · C# · Unity · Python

Data: PostgreSQL · Prisma · Firestore · Room

Academic foundations: Java · C

Architecture: Clean Architecture · MVVM · SOLID · Repository · Event Bus · TDD · E2E

Tools: Git · GitHub Actions · Docker · Vercel · Firebase · VS Code · IntelliJ · Linux · Windows

CERTIFICATIONS

Anthropic (2026): Claude Code in Action · AI Capabilities & Limitations · Agent Skills · Subagents · Claude 101 · AI Fluency

LANGUAGES

Spanish — native (Rioplatense variant)

English — professional working proficiency (strong reading and writing, fluent conversation)

INTERESTS

Continuous learning of new technologies, software architecture and AI-driven development. Applied AI and application development.
